Taco Tom's Admin Page – User Guide

Introduction

Purpose

The Taco Tom's Admin Page allows authorized staff to manage the online menu and basic site content. From this page you can:

- Add new menu items with photos and descriptions
- Edit existing items
- Mark items as available/unavailable
- Remove items that should no longer appear on the site

Only users with admin credentials should have access to this page.

Accessing the Admin Page

Logging In

1. Open a web browser (Chrome, Edge, Safari, Firefox).
2. Go to:

<https://tacotomslonchera.com/admin/admin-login.html>
3. Enter your **username** and **password**.
4. Click **Log In**.

If your login is successful, you'll be redirected to the main admin dashboard at:

- <https://tacotomslonchera.com/admin/admin.html>

If you see a login error, check that:

- Caps Lock is off.
- You're using the correct username and password. Both fields are case-sensitive.

- You're on the **secure** site (URL starts with https://).

Admin Layout Overview

The admin page is divided into two main sections:

Left sidebar:

- “Add New Menu Item” form
- Fields for name, description, price, category, availability, and optional photo upload
- “Add Item” button to create a new item

Main content area:

- List of existing menu items displayed as cards/rows
- Each row shows:
 - Item image or “No Image”
 - Name and description
 - Category (e.g., Main, Sides, Drinks)
 - Availability toggle (checkbox)
 - **Edit** and **Delete** buttons

At the top, there is a small **Logout** button that signs you out of the admin area.

The screenshot displays the admin interface. On the left, the 'Add New Menu Item' form includes fields for NAME, DESCRIPTION, CATEGORY (set to 'Main'), AVAILABLE (set to 'Yes'), and PHOTO (with a 'Choose File' button). An orange 'ADD ITEM' button is at the bottom. On the right, the 'Menu Items' section features a 'LOGOUT' button and a card for a menu item named 'test'. The card shows 'NO IMAGE' for the image, 'test' for the name, 'CATEGORY: MAIN' for the category, and an 'Available' toggle. 'EDIT' and 'DELETE' buttons are also present.

Managing Menu Items

Adding a New Item

1. In the left sidebar, find the **Add New Menu Item** form.
2. Fill in the fields:
 - **Name** (required): The item's name (e.g., "Carne Asada Taco").
 - **Description** (optional): Short description of the item.
 - **Category** (required): Choose from the dropdown (e.g., Main, Sides, Drinks).
 - **Availability** (required): Choose whether the item is available (Yes/No).
 - **Photo** (optional): Click "Choose File" to upload an image. If no photo is selected, the item will appear as a text-only item.
3. Click **Add Item**.
4. If the item is created successfully:
 - A success message appears (toast notification).
 - The new item will appear in the list in the main content area.

If an error message appears, check that all required fields (Name, Category, Availability) are filled correctly.

Editing An Existing Item

1. In the main content area, find the item you want to edit.
2. Click the **Edit** button on that item's row.
3. An **Edit Item** modal window will open.
4. Update any of the fields:
 - Name

- Description
 - Category
 - Availability (Yes/No)
 - Photo (upload a new file if you want to replace the existing image)
5. Click **Update** in the modal.
 6. On success:
 - The modal will close.
 - The item in the list will refresh with the updated information.
 - A confirmation message will appear.

If the update fails, read the error message shown and verify the fields are valid.

Toggling Availability

Use this when an item is temporarily sold out or coming back:

1. Locate the item in the list.
2. Find the **Available** toggle (checkbox) on the right side of the row.
3. Click the checkbox to:
 - Check = Available
 - Uncheck = Not available (item will be hidden from the public menu)
4. Changes are saved automatically. If anything goes wrong, a small error message will appear.

Deleting An Item

Only delete items that should never appear again (for temporary changes, use availability instead).

1. Find the item in the list.
2. Click the **Delete** button.
3. A red confirmation banner will slide down at the top of the screen.
4. Choose:
 - **Confirm** to permanently delete the item, or
 - **Cancel** to keep it.
5. After confirming:
 - The item will be removed from the list.
 - It will no longer appear on the public menu.

This action cannot be undone from the admin page.

Logging Out

To sign out of the admin area:

1. Click the **Logout** button in the header of the admin page.
2. You'll be redirected back to the admin login screen.
3. Close the browser tab if you're on a shared or public computer.

Logging out helps keep the admin area secure.

Troubleshooting

I can't log in

- Check username/password spelling and capitalization.
- Make sure you're on <https://tacotomslonchera.com/admin/admin-login.html>.
- Hard refresh the page.
 - Windows/Linux: press Ctrl + F5
 - Mac: press Cmd + Shift + R
- If you still can't log in, contact the site owner to reset your credentials.

Menu items are not updating on the public site

- Refresh the public menu page.
- Confirm the item is **Available** in the admin list.
- If the problem continues, note the time and what you tried, and report it.

Photos are not appearing

- Make sure you selected a file before saving.
- Use common formats like JPG or PNG.
- If the upload still fails, try a smaller image file.
